

# Help us create happy campers.

## Keep it friendly

Everyone's welcome at Scouts - be respectful to other groups around you. You might be pitched near other groups when it's busy, so keep to your own pitch and please don't walk through other camps.

## Keep it clean

Our team is made up of volunteers who have given up their time to run the centre. Please be considerate - keep toilet blocks clean, use the bins, and look after the centre. Let us know if you spot any problems, and we'll do our best to fix them as soon as possible.

## Keep it down

Our quiet hours are 22:30 - 07:30. Please keep noise down - especially if you're running a late night activity or leaving early. Don't forget to switch off generators during the night or when you're not using them, and position them so they don't disturb others.

## Keep it safe

Keep paths, gates and access routes clear. Leave at least 1m between tents and 3m from buildings. Think fire - risk assess, have suitable firefighting equipment, store equipment correctly, check it regularly, and keep the area clear. No fires on the grass, please. Beware of carbon monoxide - don't cook in poorly ventilated spaces or sleeping tents.

## Keep it hygienic

Please wash up using the outdoor sinks and not in the toilet blocks. Please put any food waste in the bins, and not down the sinks or in the bushes. We don't want to attract rats!

# Camping manners

Everyone's welcome at Scouts. Be respectful of people around you.

Position generators to prevent fumes and noise affecting others.

Respect the centre by using bins and leaving facilities as you found them.

Report any damage or issues at reception so we can make it safe or fix it.

Wash up in outdoor sinks or at your campsite, not inside toilet blocks.

Respect privacy and don't walk through other pitches.

Quiet hours on camping fields are from 22:30 until 07:30.

# Fire safety tips

Remember to review your fire risk assessment, and bring suitable firefighting equipment if you're camping.

Keep 1m clear between tents and 3m from buildings to prevent spread and allow escape.

Keep fuel in 5 litre containers, in a ventilated metal box capable of holding a spillage.

Camping stoves with cartridges must not be changed inside tents or near naked flames.

Keep gas bottles out of tents and away from flames. Check pipes and connectors regularly.

Be alert to carbon monoxide poisoning. See more on [scouts.org.uk/carbonmonoxide](https://www.scouts.org.uk/carbonmonoxide).

Keep flames and cooking equipment away from flammable materials.
